

Data Sheet Humazon ProMedic®

Ozone-Therapy-Generator - liscensed for autohaemo therapy

- LED-Display
- Digital-Display for vacuum- und ozone concentration
- Ozone valve (dust-tight / air-tight barrier)
- sterilizable Ozone valve
- ozone concentration to regulate from 0 up to 80 µg/ml
- vacuum-/ suck function through Vacuum pump
- automatic Cleancheck
- Timer (1 to 15 Min.) for Bag-gassing treatment
- integrated catalyzer
- justified catalyzer
- Accounting application rate from 0 to 9999 µg
- 24 month warranty

Technische Daten:

- Power supply: 230 V AC
- Power consumption: 120 VA
- Ozone generator: Ozone concentration: 0 up to 80 µg/ml +/-5%
- Gas flow: 600 ml/min.
- Suction: typical suction 6,5 l/min
- Catalyzer: Service life min. 5 years
- Ambient temperature: + 15°C 35°C
- Relative humidity: 0....75%
- Cleaning: commercially available washing-up liquid, DO NOT USE solvents (acetone)
- Desinfection: Sagrotan / Kodan or similar
- Service life: 24 month
- Dimensions (LxBxH) 42 x 50 x 15 cm
- Weight: 7,60 kg
- Referred position: CE 0535, EUROCAT/BSI Institute for Certification and Testing
- Product classification: EU directive 93/42 EEC for medical equipment, Appendix II b

CE 0535
